

The first two hours of a Train Derailment, Pipeline or Truck Incident - Are you ready?

Free Training

September 17, 2016 8AM – 3PM

- *Hands-on and Classroom Activities*
- *Complimentary lunch*
- *Certificates upon completion (8hr credited CE) *

Emergency Response – A session detailing the primary elements of how local emergency responders can best cope with rail, pipeline or truck emergencies. Safety is the basis of the course beginning with communication. What are and how to use the toll free emergency telephone numbers, establishing site safety and size up or assessment of the incident. Including Tank Car, pipeline, and trailer construction, identification, behavioral characteristics, leak identification and defensive actions. What to expect from and how to work with the emergency response team.
*closed toe shoes and long pants required
